

FitBuzz Feature Walkthrough

Getting Started

1. Landing & Sign Up

- Visit <http://localhost:3000> — the landing page has a hero section with the brand, feature highlights, and a toggle between **Sign In** and **Sign Up** forms.
- Create a free account to unlock the training space.

2. Connecting Your Backend

- If Supabase isn't configured yet, you'll see a "Connect your Supabase project" screen. Add your project URL and anon key to `.env.local`, then apply the SQL migration from `supabase/migrations`.

The Dashboard — Your Training Space

Once logged in, you land on the **Overview** tab. The layout is a sidebar on the left and the main content area on the right.

Sidebar Navigation (6 sections)

Navigation Item	Icon	What it does
Overview	LayoutDashboard	Home base — weekly stats, activity chart, suggested workout, recent workouts
Workouts	Dumbbell	Full training log with search, category filters, and quick-start templates
Training plans	CalendarDays	AI-generated or custom multi-week programs (Pro/Elite only)
Progress	TrendingUp	Monthly milestones, streak tracking, advanced analytics (Pro/Elite only)
Membership	CreditCard	Upgrade/downgrade plans, manage billing

Settings	Settings2	Units toggle (lb/kg), reminders, weekly recap, sign out
-----------------	-----------	---

The top bar always shows a breadcrumb (Training space > [Current View]) and a **Search workouts** input — typing in it auto-switches to the Workouts tab.

A **Notifications** bell (top-right) shows a "You're all caught up" toast when clicked.

At the bottom of the sidebar, your avatar, display name, and email are shown. The "Your next step" coach card prompts you to explore training plans.

Overview Tab — What You See First

1. **Page Heading** — today's date, a personalized greeting (Good morning, [name]), a subtitle, and a **Log workout** button that opens the workout modal.
2. **Stats Grid** (4 cards)
 - a. **Workouts this week** — session count with a vs-last-week change indicator
 - b. **Active minutes** — total minutes this week
 - c. **Current streak** — consecutive days with a personal-best detail
 - d. **Today's volume** — strength volume in your chosen unit (lb or kg)
3. **Your Activity** (bar chart panel)
 - a. Toggle between **This week** / **Last week**
 - b. Seven-day bar chart of active minutes
 - c. Weekly goal indicator: 300 minutes
4. **Suggested Workout** (feature card)
 - a. A "Strong start, steady finish" recommendation with photo, category, duration
 - b. **Start this session** button logs a workout named "Upper body strength"
5. **Recent Workouts** — the 4 most recent sessions with a **View all** link to the Workouts tab.

Workouts Tab — Your Training Log

1. **Quick Start** — three templates you can add to today with one click:
 - a. **Full body reset** (Strength, 40 min)
 - b. **Easy miles** (Running, 30 min)

- c. **Move better** (Mobility, 25 min)
- 2. **All Sessions** — a filterable list:
 - a. **Filter by type**: All types, Strength, Running, Mobility, Cardio
 - b. **Search** by name or category
 - c. Each workout shows title, category, duration, volume, date
 - d. Delete button per workout
- 3. **Log Workout Modal** — click **Log workout** (or the + button) to open a form:
 - a. **Workout name** (required, max 80 chars)
 - b. **Workout type** (dropdown: Strength / Running / Mobility / Cardio)
 - c. **Duration** (minutes, 1–600, default 45)
 - d. **Weight moved** (optional, in your selected unit)
 - e. **Save workout** (with saving state and cancel option)

When saved, you get a toast ("Workout added to your training log.") and the view returns to Overview.

Training Plans Tab — Structured Programming

Requires Pro or Elite — Free users see a locked feature card with benefits and an **Upgrade to Pro** button.

If you have access:

1. **Generate AI plan** button — currently shows "More training plans are on the way" toast (AI generation is a future feature).
2. **Your Programs** grid — cards showing:
 - a. Title, description
 - b. Status badge (Active / Completed / etc.) and **AI** badge if AI-generated
 - c. Week X of Y, sessions/week, completed/total sessions
 - d. A progress bar with percentage
 - e. **Continue** button if the plan isn't finished
3. If you have no plans yet, an empty state offers a **Generate AI Plan** button (coming soon).

Plan data is fetched from `/api/training-plans?userId=<id>`.

Progress Tab — Advanced Analytics

Requires Pro or Elite — Free users see a locked feature card.

If you have access:

1. **Stats Grid** (4 cards)
 - a. **Sessions completed** — this month vs last month (% change)
 - b. **Time well spent** — minutes this month
 - c. **Training streak** — current days, best ever
 - d. **Consistency** — % with a status label (On track / Building / Keep going)
2. **Monthly Milestones** — progress rows toward goals:
 - a. Training sessions: X / 16
 - b. Active minutes: X / 720
 - c. Keep the streak alive: X / 5 days
 - d. Make time to recover: X / 4 mobility sessions
3. **Your Current Streak** — big number with a 7-day dot grid showing which days are done.

Data is fetched from `/api/analytics?type=summary, ?type=weekly,`
and `?type=streak`.

Membership Tab — Plans & Billing

Three plan cards:

Plan	Price	What you get
Free	£0/mo	Core tracking, 100 API calls/mo, 1 custom plan
Pro (recommended)	£9.99/mo	AI plans, form coaching, advanced analytics, unlimited plans, 5,000 API calls/mo
Elite	£24.99/mo	24/7 AI coach, 50,000 API calls/mo, developer API, priority support

- **Current plan** is marked with "Current plan" badge.
- If you have an active subscription, the button says **Manage billing** (opens Stripe portal) or **Opening billing...** while loading.
- If you're on Free or haven't subscribed, buttons say **Choose [Plan]** and trigger checkout via `/api/checkout`.
- Toast messages confirm: payment received, checkout cancelled, billing updated.

Settings Tab — Preferences

1. **Units** — toggle between **lb** and **kg** (affects volume display everywhere).
2. **Workout reminders** — on/off toggle for planned training day nudges.
3. **Weekly progress recap** — on/off toggle for a Sunday summary.
4. **Your account** — shows your email and a **Sign out** button.

Feature Gating Summary

Feature	Free	Pro	Elite
Log workouts	✓	✓	✓
Weekly activity chart	✓	✓	✓
Quick-start templates	✓	✓	✓
Search & filter workouts	✓	✓	✓
Training plans (AI)	✗	✓	✓
Advanced analytics	✗	✓	✓
Monthly milestones	✗	✓	✓
Streak tracking	✓	✓	✓

When a Free user clicks Training plans or Progress, they see a "Unlock [Feature]" card explaining the benefits and an **Upgrade to Pro** button that switches to the Membership tab.

Typical User Flow

1. **Sign up** → land on Overview
2. **Log a workout** via the modal or a quick-start template
3. Watch the **stats cards** and **activity chart** update
4. Browse **recent workouts** on Overview, or go to **Workouts** for the full log
5. **Search** or filter by category when the log grows
6. On **Pro**, generate or view **training plans** and track multi-week progress

7. On **Pro/Elite**, visit **Progress** for monthly milestones and analytics
8. Manage your plan on **Membership** — upgrade, downgrade, or open the billing portal
9. Tweak display and notification preferences on **Settings**
